

In addition to the art curriculum, Highgate Primary School wants to increase pupils' experiences in the **art room**. We want to promote intuitive and explorative experiences. An atmosphere of playmates to enrich social and personal development. Let's be creative.

Year 2 explored how animals camouflage in nature. They hid an animal using block printing, based on the stamping process, giving them the imagination to create freely.

Year 3 immersed in palaeontology. They worked with the 'super-mega diplodocus, Spotty the Dinosaur', papier mâché's dinosaur model; exploring the sensory quality of materials and processes. Children's historical and creative skills are compiled in a new display.

'super-mega diplodocus, Spotty the Dinosaur',

Year 6 were involved in the interpretation of a mountain. From a 2D exploration of landscape paintings to 3D studies of mountains. Fabulous teamwork, planning, designing, and making the pieces; from selecting and labelling the final work, to taking pictures, and being hands-on with the props. A creative artwork display at Highgate Primary School Bridge. Please, come and visit!

The Sketch Club has been busy, customizing their sketchbooks and filling them with spontaneous drawings of life models, still life and observations from the peace garden. They finished the half term painting a small canvas with acrylic.
