

Reception enjoyed an adventure, making their survival shelters from scratch. Exploring and using the media to be imaginative. From the frames to the fabric decorations, just like the native American teepees or Bedouin tribes' shelters. A collaborative work that made us feel comfy and safe :)

Year 2 learned about Futurism's different techniques and resources - dry pastels, paint, rulers, stamps... Experimenting with lines, repetition and blurring to come up with extraordinary, dynamic images. Modernity, industry, technology... let's talk about Futurism!

Year 4 were immersed into Roman life and their legacy in Britain. Children designed and made their own Roman mosaics using a limited range of 'tesserae' colours, tending toward monochrome and inspired by Roman themes; animals, gladiators in battle, weapons and scenes from both mythology and astronomy. The decorative design and motifs are made with patience, problem-solving and creative ideas. Well done Year 4!

Year 5 made their solar system 3D planets using plaster of Paris. They were looking at the relation between art and science to understand the geology of planets through art elements (line, shape, colour, value and texture). Making their studies of colour and texture analysing NASA images from space.

You can visit Highgate Solar System between the Mandarin and the art room - a new space created by Year 5.

The magic of colour - the art club has been converted into a lab; experimenting and learning about colours, customising sketchbooks and filling them with spontaneous drawings.

Upcoming...

Highgate Primary School Community

Quilt Project

Inspired by, "The Sky "

We will be introducing a vibrant, sustainable and social project from now until summer. All the children will partake in an hour of customizing their own patch of fabric and sewing it onto a collage, that will come together as a large community quilt to be hung on a wall within the building.

We hope this will engage the children to think further about recycling in art and everyday life; learn practical skills and enjoy the experience of our community coming together again. Further details to follow shortly.
